ARC®

Construction Plans
in the Palm of Your Hand

An easy-to-use mobile solution for the hardest workers out there

PART OF ARC'S
DESIGN AND CONSTRUCTION PRODUCTIVITY SUITE

ARC's Productivity Suite is designed to meet your needs from site-mapping to closeout. Everything you need and anywhere you need it, available through a single-source provider.

Scalable
Use these tools and services – standalone or combined – on one job or many – to multiply the impact on your projects.

Comprehensive
This single-source of resources seamlessly enhances your project workflows and fills the gaps.

Smarter
Improve performance at every stage of the project lifecycle with increased intelligence - driving smarter decisions.

Your crew is under pressure every day to stay on schedule and on budget which means the office and the field must be in sync with the most current project details. When project work is halted because someone doesn't have the current set or the right materials, more than just a couple of hours is lost.

To your construction teams, time is their most perishable resource and wasting it goes against their principles. When you give them intuitive, user-friendly technology and tools that help ensure they stay on schedule and budget, they won't just use them; they'll embrace them.

Keep connected no matter where the day takes you, and keep the office and field in sync with instant access to the most up-to-date information with ARC's SKYSITE Projects.

The most current project information at your fingertips

Project teams are always on the go so having instant access to the most up-to-date project information is critical – whether in the office, on the road, or at the jobsite.

The SKYSITE Projects mobile platform allows your entire project team to access information anytime, from any device, even without an internet connection. Manage and search your project emails, manage RFIs and Submittals, mark up and share documents and photos, and reduce risk with version control.

Always work from the latest set

Never work from outdated plans again with our cloud-based file sharing and project collaboration tool with real-time syncing that ensures everyone is always on the same page.

Fewer mistakes, less rework

Improve productivity and eliminate costly mistakes with purpose-built construction administration tools that helps the project team to work as one.

One-click collaboration

With one click, you can share the latest files, drawings, photos and document packages with your entire team in real-time to ensure everyone has the latest information.

Manage and share all your project documents

With ARC's SKYSITE Projects, you can organize, search, share and markup all your project documents in one place. Sync your projects across all your devices and ensure your entire team is always working from the latest documents. Construction admin workflows makes coordination between the office and field seamless.

Go Mobile
Access your information from any device, when and where you need, in seconds.

Unlimited storage
Upload all of your project documents and forget about paying by the sheet.

Latest Set
Automatically place drawing revisions in order and ensure that you never work from an outdated document again.

Punch List Management
Track tasks throughout construction and save hours at closeout by tracking punch list progress and completion.

RFI Administration
Create, track and respond to RFIs in real-time to speed up your project delivery.

Submittals
Process digital submittals that are easy to send, find, and manage for faster approvals.

Email Management
Store, track, sync and search your team's project emails in one place with all your project documents.

Document Management
Upload, view and share multiple file types including MS Office files, JPEG, TIFF and videos.

Photo Management
Tag, organize and link your project photos to drawings, RFIs and punch lists.

Powerful Search
Instantly search through your projects, and in documents, to zero in on the info you need.

Markup
Generate notes that are available to your team in real-time using callouts, measurements, links to photos & docs, and more.

Activity Tracking
Keep track of all the changes and edits made to your documents automatically.

Order Prints
Order professional, wide and narrow format prints, with a click, from over 170 global locations.

Enhanced Security
Keep your information safe. SKYSITE is ISO 27001 certified and offers single sign-on for powerful security.

Project Management

All the resources you need in one place

ARC's Design and Construction Productivity Suite is built to meet your needs from site-mapping to closeout. Everything you need and anywhere you need it, available through a single-source provider.

The power of the Productivity Suite is realized when a combination of complementary tools and services help you aggregate project intelligence to track project progress, monitor job-site conditions and proactively detect design and constructability issues.

Exponential layers of value in the form of increased productivity, shareable project intelligence and reduced costs are realized as additional solutions are put into use.
