

Abacus 5.0 Document Workflow & Print Management Software

Streamline print environments and control costs

90%

of companies **don't know** how many printers they have or how much they spend on print.

Print costs are **out of control**

Most companies have gaps in print efficiencies

- **Unnecessary printing** - users have no idea what a single print costs
- **Abandoned print documents** - on average 17% are never picked up by users
- **Unnecessary color printing** - users don't pay attention to default printer settings
- **Low value use of IT resources** - IT teams shouldn't spend time managing printers and printing workflows

Gain control with insightful dashboards

Abacus improves document workflow and print management to deliver increased cost savings, environment-friendly workflows, and across the board productivity improvements.

Dashboard Metrics

Gain visibility into your print environment

Real-time Snapshots

Reveal print activity and user behavior

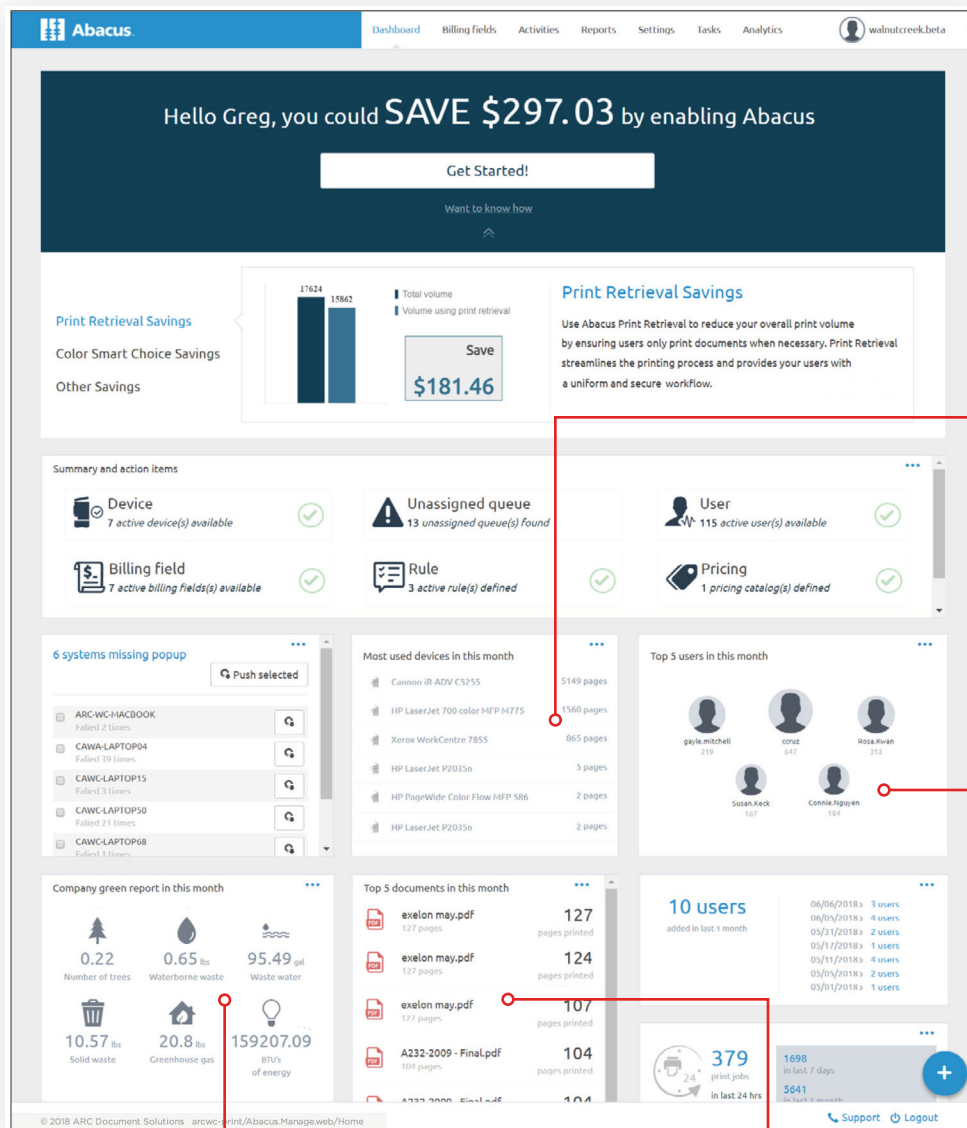

Smart Choice Options

Achieve green initiatives and cost savings goals
