File Sharing, Document Distribution, and Design & Build Project Collaboration That Guarantee Your Teams are Always Working from the Latest Set

SKYSITE is a construction app that helps your project teams easily store, share, distribute, and collaborate on construction documents in real-time.

From anywhere.
At any time.
On any device.

SKYSITE enables you to:

- Deliver your projects on time and within budget.
- Ensure your entire project team always works from the latest set.
- Automatically synchronize critical documents between the SKYSITE cloud and all your teams' desktops and tablets.
- Efficiently manage RFIs, photos, and punch lists.
- One-click share your projects, folders, files, blueprints, photos, bid packages and more.
- Easily markup drawings in the field and share with your entire team in seconds.

Why SKYSITE?

- **Index, organize, store, and manage** ALL your construction documents, markups, schedules, photos, and more in the secure SKYSITE cloud.
- **Automatically synchronize** document updates and project information right to your teams' computers and tablets in real-time.
- **Start projects faster** using SKYSITE's bid package distribution feature.
- **Gain complete document version control and revision history** to record changes to your bid package.
- **Tracking and reporting capabilities** that deliver full details on who got the bid package, RFI response, or latest markup.
- **Closeout faster** with punchlist management and efficient distribution of as-builts.
- **Eliminate the need for multiple applications** and duplicating data entry with cost-effective, unlimited cloud storage.
- **Easily share and access** the most current project information from anywhere, from any device, at any time.
- **Collaborate efficiently** with external team members without having them purchase or download SKYSITE.
- **Centralize project information** by making it easily accessible to maximize your team's productivity and efficiency.
- **SKYSITE is construction-grade** and designed exclusively for the complex workflows of the design and build industry.
- **So simple and easy** to use that your entire team will use it.
- If you need **face to face support** or training, we'll connect you with a local construction document expert from one of our 200 offices around the world. At the office, in the trailer, or on the job site, we'll find the best way to make your document management meet your needs.

SKYSITE Features

Automatic Sync

Send updates to the desktops & tablets of your team in real-time, simply by updating the document

Go Mobile

Access the latest set or upload/distribute documents of any file type from anywhere, at anytime via any web browser.

RFI Administration

Easily organize, track and respond to RFIs in real-time to speed up your project delivery

Made for Design and Build

No matter how complex your project workflow is, SKYSITE works the way you do

Photo Management

Tag and organize your project photos & link them to drawings, RFIs, and punchlists for faster searches

Powerful Search

Quickly search through even millions of documents, emails, and design specs to cut days off your projects

Punch List Management

Save hours, even days, at closeout with tracking of punchlist progress and completion

Unlimited Storage

Unlike other construction apps, avoid added costs and upload ALL your documents in a single location

Schedule a quick demonstration of SKYSITE in person or on the phone by calling **844.SKYSITE** or visit **SKYSITE.com** for more details.
