INSTALLATION AND TECHNICAL GUIDE

Components

LOMAX STANDARD COUNTERWEIGHT (HOARDING AND FENCING APPLICATIONS)

- 90x45mm (4x2) recess designed to receive either a vertical hoarding timber stud or a fencing support post
- Integrated metal plates to retain either the timber stud or the fencing support post
- 32mm OD holes to receive hoarding support posts or fencing panels
- Horizontal track to receive hoarding crossbeam support timbers
- Easy carry handles
- Interlocking shape for secure stacking
- 18Kg weight

HOARDING COMPONENTS

LOMAX SUPPORT POSTS - LARGE AND SMALL

- 2 x 32mm OD guide-prongs to slide into Full Sized Counterweight
- Galvanised steel construction for strength and durability
- Easy to stack, store and transport
- 5Kg weight

LOMAX DOUBLE SUPPORT POSTS

- 4 x 32mm OD guide-prongs to slide into double stacked Full Sized Counterweights
- Galvanised steel construction for strength and durability
- Easy to stack, store and transport
- 9Kg weight

FENCING COMPONENTS

LOMAX SADDLE COUNTERWEIGHT

- 90x45mm (4x2) recess designed to receive fencing support post
- Integrated metal plates to retain the fencing support post
- Easy carry handles
- Interlocking shape for secure stacking on top of the Standard Counterweight
- 30Kg weight

LOMAX FENCING SUPPORT POSTS

- 90x45mm (4x2) shaped base to fit into the recess in the Counterweights
- Integrated panel clamp (separate loose clamp not required)
- Galvanised steel construction for strength and durability
- Easy to stack, store and transport
- 5Kg weight

Indoor Impact-Rated Hoarding: 1.8mH – 6mH

BUILD GUIDE FOR INDOOR AND OUTDOOR 'SINGLE STACK' HOARDINGS UP TO 6MH

1. Stack Lomax® counter-weights

2. Insert standard 90x45 (4x2) MPG 10 stud (non-ribbed)

3. Insert Lomax® Support Post

4. Attach panels

5. Add cross beam

ABOVE GUIDE IS FOR 'SINGLE WEIGHT STACK' CONFIGURATIONS ONLY. ADDITIONAL PRE-CERTIFIED 'DOUBLE STACK' CONFIGURATIONS ARE AVAILABLE. PLEASE CONTACT LOMAX HOARDING AND FENCING FOR TECHNICAL GUIDANCE.

HOARDING SYSTEM SPECIFICATIONS + REQUIREMENTS

DETAILS	COMMENTS
All Configurations Designed + Structural Engineer Tested to:	Indoor Impact tested: AS 4687:2022
Panel Height Options (All Freestanding)	Indoor: 1.2mH – 8mH + Outdoor: 1.2mH – 4mH
Panel Thickness Options	Min 12mm required
Panel Type Options	Mdf, Particle, Ply, Melamine, EPS
Min Quantity of panels needed for certification	3
Lomax Counterweight (Kg)	Approx 18Kg each
Stack types	Single or Double – See various illustrations
Double Stack Safety Rod (Only one per rear stack required)	10mm rod / 50mm washer top and bottom / Bottom lock nut (see separate rod height guide)
Stud Requirements: 1.2mH – 6mH (Indoor) + 1.2mH – 4mH (Outdoor)	Single vertical 90x45mm (4x2) MPG 10 (smooth / non-ribbed)
Stud Requirements: 6.1mH – 8mH (Indoor)	Double vertical 90x45mm (4x2) MPG 10 (smooth / non-ribbed) – See joining guidelines
No movement Crossbeam Stud Requirements: 1.2mH – 6mH	1 x horizontal 90x45mm (4x2) MPG 10 (smooth / non-ribbed) – see illustration
No movement Crossbeam Stud Requirements: 6.1mH – 8mH	2 x horizontal 90x45mm (4x2) MPG 10 (smooth / non-ribbed) – see illustration
Screw Requirements: 1.2mH – 6mH (Indoor) + 1.2mH – 4mH (Outdoor)	Min 40mm x 8g (to attach panels plus attach support post to vertical timber)
Screw Requirements 6.1mH – 8mH+ (Indoor)	Min 40mm x 8g (to attach panels) + 50mm x 12g (to attach support post to vertical timber)
Screw Spacing: 1.2mH – 6mH (Indoor) + 1.2mH – 4mH (Outdoor)	100mm from top and bottom of panels – then each 400mm-500mm in between
Screw Spacing 6.1mH – 8mH+ (Indoor)	100mm from top and bottom of panels – then each 400mm in between
Screw Spacing and requirements for stud joining	400mm Spacing – Staggered placement of 75mm x 14g Bugle (see illustration)

Lomax® – ‘Safe Pedestrian Zone’ Fencing Solution

LOMAX FENCING SYSTEM (INSTALLATION GUIDE)

1. Stack counterweights as per guide below

2. Insert standard 32mm OD fencing panel posts into post holes

3. Insert Lomax Fencing Support Post with integrated panel clamp

4. Stacks are placed inside to create a 'Safe Pedestrian Zone' outside the fence

5. Place stacks at a 45 degree angle to create a corner

SAFETY PRECAUTIONS / CHANGES OF ENVIRONMENT

As the purchaser and responsible installer of the various components of the 'Lomax System' it is paramount that due consideration is given to the location of any installation and that the appropriate system configuration deployed is fit for purpose. This consideration should include not only the existing location being considered but also any potential changes to that location that may occur during the lifecycle of the installation. **FOR EXAMPLE:** If a hoarding is being installed into an indoor location with the correct system configuration, then proper consideration should be made to understand if any 3rd party or external factors may be altered during the hoardings' lifecycle that may possibly expose the hoarding to outdoor wind pressures. As an example, these changes could include removal of external walls or activations of base build exhaust systems and as such these additional factors should be considered when selecting the correct system configuration. The purchaser and installer are the responsible party to consider these factors so as to select the correct system configuration for existing and possible future site conditions.

GENERAL TERMS AND CONDITIONS

HOARDING: The intent of this document is to clearly describe and illustrate the build process and structural certification parameters of the various indoor and outdoor modular configurations for the Lomax System. Particular attention should be given to the screw type, screw spacing required and correct configuration selection based on both existing location factors and possible changes to those factors (such as wind impacts). **FENCING:** Due to the external nature of fencing installations that vary by location, wind levels, shade-cloth & signage requirements, no single guide can meet all scenarios. As such, these images are general and for illustration purposes only and additional guidance should be sought to ensure compliance prior to installation. **GENERAL:** By signing this Technical Guide, you as the purchaser and responsible installer confirm your understanding of the details within and acknowledge that any variation ensures that pre-certified compliance no longer applies.
